

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

NEW MAPS

EDITED BY THE ASSISTANT EDITOR

For system of listing maps see p. 75 of this volume

MAPS ISSUED BY UNITED STATES GOVERNMENT BUREAUS

U. S. GEOLOGICAL SURVEY

Maps Accompanying Publications

Alaska. (a) Reconnaissance Map of Seward Peninsula, Alaska. 1913. 1:500,000. 66°40' - 64°0' N.; 168½° - 160½° W. 5 colors.

(b) Geologic Map of Seward Peninsula, Alaska. Compiled and arranged by Philip S. Smith. 1:1,500,000. 66°40' - 64°18' N.; 108½° - 160½° W. 9 colors.

(c) Sketch map of Nome region, showing distribution of placers. [1:120,000.] 64°40' - 64°30' N.; 165°35' - 165°17' W.]

Accompany, as Pls. I and IV and Fig. 5 respectively, "Surface Water Supply of Seward Peninsula, Alaska" by F. F. Henshaw and G. L. Parker, *Water-Supply Paper 314*, 1913.

[Map (a) an important topographic map (relief in contours; interval 200 ft.) combining into one the various maps of parts of the Seward Peninsula hitherto published by the Survey. Gold placers, river-gaging and rainfall stations are shown on it. Map (b) is a valuable compilation of the geology. Map (c) differentiates between (1) stream bench and beach placer deposits, (2) high bench placer deposits.]
